LAB PROGRAM - 9

```java
class thread1 extends Thread
{
    thread1()
    {
        new thread ("thread1");
        start();
    }
    public void run()
    {
        while (true)
        {
            try
            {
                System.out.println(" BMS college of
                                Engineering");
                thread.sleep(100000);
            }
            catch (Interrupted Exception ie)
            {
                System.out.println(" Interrupted");
            }
        }
    }
}
```

```java
class thread2 extends Thread
{
    thread2()
    {
        new thread("thread2");
        start();
    }
    public void run()
    {
        while(true)
        {
            try
            {
                System.out.println("CSE");
                Thread.sleep(2000);
            }
            catch(InterruptedException ie)
            {
                System.out.println("Interrupted");
            }
        }
    }
}

class thread_main
{
    public static void main(String args[])
    {
        System.out.println("Enter CONTROL+C to stop");
        thread1 t1 = new thread1();
        thread t2 = new thread2();
    }
}
```
